📍 54 A, COOK STREET

🚗 NZ Driving License

Cybersecurity postgraduate student at the University of Waikato with hands-on experience in SAP data systems, software development, and secure coding practices. Proven background in troubleshooting, system support, and full-stack development. Skilled in network security, vulnerability detection, and cyber threat analysis. Passionate about leveraging analytical skills to develop practical, secure technology solutions.

PROFESSIONAL EXPERIENCE

SAP Support Analyst, IT LINK COMPUTER LLC, AJMAN

12/2021 – 05/2024

- Provided user support and resolved SAP system issues related to access and data integrity.
- Handled minor configuration, role assignments, and monitored system anomalies.
- Contributed to patch testing and documentation to support security compliance.

Ajman,
United Arab Emirates

Software Developer, SIGMA SOLUTIONS, AJMAN

01/2020 – 11/2021

- Developed scalable software using Java, Python, and C++ with secure coding standards.
- Built responsive front-end using HTML, CSS, and JavaScript.
- Worked on SQL database integrations and performed testing/debugging.

Dubai,
United Arab Emirates

Computer Science Teacher, CITY PRIVATE SCHOOL, AJMAN

06/2019 – 12/2020

- Taught programming, networking basics, and cybersecurity awareness.
- Mentored students in ethical coding practices and digital responsibility.

Ajman, Dubai

EDUCATION

Master's in Cyber Security, University of Waikato

07/2024 – present

Relevant Modules: Network Security, Ethical Hacking, Cyber Threat Intelligence, Secure Programming, Cryptography

Hamilton,
New Zealand

Master's in Computer & Information Science,

APJ Abdul Kalam Technological University

GPA: 9.08 / 10

04/2015 – 08/2017

Kollam, India

Bachelor's in Computer Science & Engineering, Kerala University

GPA: 6.9 / 10

04/2011 – 04/2015

Kollam, India

SKILLS

Cybersecurity & Networking:

Threat Analysis, Vulnerability Assessment, Network Security, Secure Programming, Digital Forensics, Incident Response, Risk Management

Tools & Platforms:

Wireshark, Burp Suite, Splunk, Metasploit, Nmap, SAP BW/BI, HANA, Advanced Excel

Databases:

SQL, MySQL, Database Design

Programming:

Python, Java, C++, HTML, CSS, JavaScript

Cloud & DevOps:

AWS (basic), Git, Docker

Testing & Debugging:

Unit Testing, Secure Code Review, Automation Testing

LANGUAGES

English

Hindi

Malayalam

Tamil

PROJECTS

Profiling cyber attackers through attack tactics, Capstone Project

06/2025 – present

- This project focuses on classifying and understanding cyber attackers by analyzing their behaviors, techniques, and tactics.
- Aimed to assist cybersecurity defense teams with actionable attacker insights for proactive threat mitigation.

eHub – E-Commerce Web Application

07/2024 – 11/2024

- Developed a fully functional e-commerce web application called “eHub” using **React.js**, **Node.js**, and **MongoDB**.
- Implemented features such as user authentication, product listing, cart management, and secure order processing.
- Designed a responsive user interface for optimal performance across devices.
- Utilized RESTful APIs for seamless client-server communication.
- Focused on backend security, data validation, and performance optimization.
