Profile

Software engineer with a Master's in Cyber Security (First Class Honours) and strong experience supporting and developing production systems. Skilled in Python, SQL, REST APIs, and automation, with exposure to React, Node.js, and Java environments. Proven ability to troubleshoot live issues, improve performance, and contribute to secure, reliable releases. Strong understanding of secure coding, identity and access management, and vulnerability awareness. Interested in building scalable, high-quality software in security focused environments.

Professional Experience

12/2021 – 05/2024
Dubai, United Arab Emirates

SIGMA SOLUTIONS

Software Developer

- Developed and maintained Python backend services using clean, modular, and secure coding practices.
- Designed and consumed RESTful APIs, managed JSON data, and supported system integrations.
- Monitored application and system logs, identified anomalies, and investigated production incidents through resolution.
- Supported deployments and troubleshooting in high-availability production systems.
- Collaborated with cross-functional teams in Agile/ Scrum setups, contributing to peer reviews and controlled changes.

07/2020 – 11/2021
Dubai, United Arab Emirates

IT LINK COMPUTER LLC

SAP Support Analyst

- SAP Support Analyst Supported enterprise systems in live environments with focus on stability and availability.
- Assisted in release validation, patch testing, and environment readiness.
- Managed user access and supported governance practices

06/2019 – 06/2020
Ajman, United Arab Emirates

CITY PRIVATE SCHOOL

Computer Science Teacher

- Taught programming fundamentals, database concepts, and basic networking.
- Mentored students in problem-solving and logical thinking.

Education

07/2024 – 11/2025
Hamilton, New Zealand

Master's in Cyber Security- First Class Honours

University of Waikato

04/2015 – 08/2017
Kollam, India

Master's in Computer & Information Science

APJ Abdul Kalam Technological University

04/2011 – 04/2015
Kollam, India

Bachelor's in Computer Science & Engineering

Kerala University

Skills

Frameworks & Frontend

- React, Node.js
- HTML, CSS, JavaScript

Cloud & Platforms

- Microsoft Azure fundamentals
- AWS basics
- Linux / Windows environments

Databases

- SQL Server / PostgreSQL concepts
- Performance optimisation

Security Knowledge

- Secure coding
- Authentication & RBAC
- OWASP & vulnerability concepts
- MITRE ATT&CK
- SIEM & log analysis fundamentals

Dev Practices & Tools

- Git, CI/CD awareness, Linux, Windows, Azure basics, AWS basics

Programming & APIs

- Python, SQL
- RESTful APIs, JSON
- Object-oriented design

Projects

06/2025 – 11/2025

Taxonomy-Driven Framework for Cyber Attacker Classification & Behavioural Mapping

- Analyzed 14M+ real-world attack events using Python and SQL.
- Identified attack patterns, attacker behaviors, and threat vectors
- Mapped attacker techniques to MITRE ATT&CK.
- Performed incident-style analysis and documented findings.
- Strengthened skills in threat intelligence, detection logic, and investigation

03/2025 – 06/2025

Web Application Security Testing Project

- Tested web applications against OWASP Top 10 vulnerabilities.
- Performed manual testing and vulnerability analysis.
- Documented findings and recommended secure coding improvements.
- Strengthened understanding of secure application architecture.

07/2024 – 11/2024

Full Stack E-commerce Application

- Designed and developed a full-stack e-commerce platform supporting product browsing, cart, and order workflows.
- Built backend services using Python and REST APIs with JSON-based communication.
- Implemented authentication, role-based access, and secure session handling.
- Integrated database operations for product, user, and transaction management.
- Applied modular design and separation of concerns to improve maintainability.
- Performed testing, debugging, and performance improvements across components.
